

Motorcycle super smooth running

SAE 10W-30. 10W-40. 10W-50. 20W-50

Description:

Kompressol motorcycle super smooth running is created as a synthetic smooth-running motorized oil according to the most modern high-tech concept. Its outstanding level of performance for all motorcycles gives Kompressol-Motorrad super smooth running properties that can no longer be achieved with conventional motorcycles:

- Fastest possible supply of all lubrication points in the engine thanks to exceptionally good cold flow behavior
- highest possible temperature stress
- favorable cold start behavior through SAE 10W-30/40/50, SAE 20W-50
- Unrestricted year-round suitability thanks to SAE 10W-30/40/50, SAE 20W-50 even in extreme summer temperatures
- extreme reduction in evaporation losses

Specifications:

API	SL / SJ
Aprilia	
BMW	
Ducati	
Honda	
So yes	MA / MA-2
Kawasaki	
Moto Guzzi	
Suzuki	
triumph	
Yamaha	

Application:

Kompressol motorcycle super smooth running makes the engine particularly easy to start. The good pumpability results in a faster supply of all lubrication points and thus reduces cold start wear.

Kompressol motorcycle super smooth running can be mixed with conventional motorbike oils. However, the above-mentioned advantages can only be achieved in full if they are used unmixed.
